

Four things you may not know about your Advantage Account

When you get a new bank account, most banks ask you to choose between a great interest rate, no fees and the ability to bank the way you want. With your Advantage Account, you don't have to choose.

Here are four things you may not know about your Advantage Account:

One. You have access to all the features of a chequing account. You can send an e-Transfer to your brother. Tap to pay for tonight's take-out. And use our mobile app to deposit that cheque your parents sent you for your birthday.

Two. You can bank for free. When you keep a thousand dollars in your account, there are no fees for any of your daily banking transactions (fees apply for daily banking transactions when your balance is below \$1,000).

Three. You earn a great rate of interest on every dollar in your account. Because you deserve to earn interest on your money.

Four. You can access your account at thousands of ATMs across Canada with no convenience fee. Check out our website to find one near you.

With your Advantage Account, you can have it all.
