

Manulife One Tracking Sub-Accounts

[Animation of Manulife One logo]

Manulife One simplifies your banking by consolidating your debt within one account.

But what if you want to track some of your debt and interest separately like money, you use to buy an investment or loan to a family member?

With Manulife One Tracking Sub-Accounts you can.

A Tracking Sub-Account is simply a way of sectioning off a part of your debt so you can track that debt and the interest it's charged separately.

Imagine you loan \$5,000 to a family member and want to keep track of that debt separately.

[Animation showing icons and money amounts moving from one account to another]

Simply set up a Tracking Sub-Account online and move \$5,000 of debt into the Sub-Account.

Each month the interest payment is taken from your main account and reported separately in your statement.

You can pay down that debt at your own pace by setting up regular principal payments or making one-time payments.

You can even pay it off completely whenever you want without pre-payment charges.
